Game container

To build the docker : **docker build -t banditgames-ai .**

To run the docker : **docker run --rm -p 8001:8001 banditgames-ai**

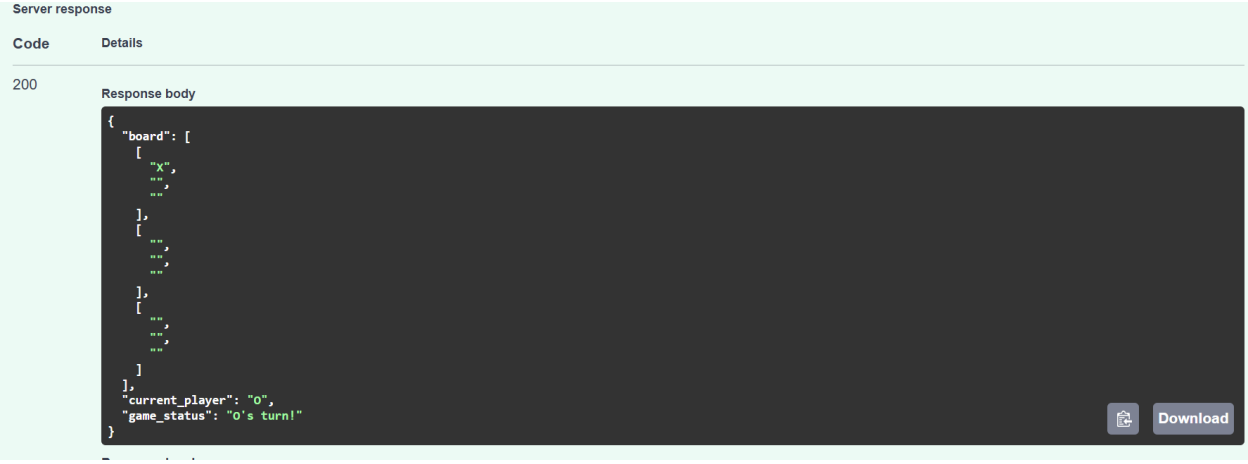

To test it :

http://localhost:8001/docs#/default/make_move_api_game_move_post

with :

```
curl -X 'POST' \
  'http://localhost:8001/api/game/move' \
  -H 'accept: application/json' \
  -H 'Content-Type: application/json' \
  -d '{
"board": [["","",""],["","",""],["","",""]],
"currentPlayer": "X",
"move": { "row": 0, "col": 0 }
}'
```

Response should be :

To check for error :

docker ps

docker logs <container_id_or_name>

AI Container

To build : **docker build -f Dockerfile.ai -t banditgames-ai-ai .**

To run : **docker run --rm -p 8002:8002 banditgames-ai-ai**

To test :

{ "board": [["X","",""],["","O",""],["","",""]], "currentPlayer": "X", "legalMoves": [{ "row": 0, "col": 1 }, { "row": 2, "col": 2 }]

And the response should be:
