Game container

To build the docker : **docker build -t banditgames-ai .**

To run the docker : **docker run --rm -p 8001:8001 banditgames-ai**

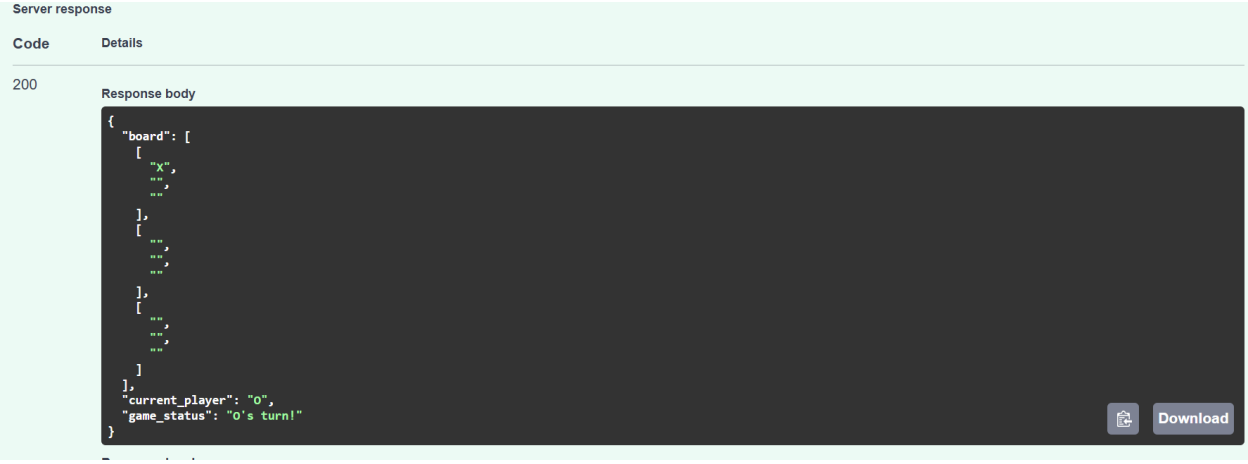

To test it :

http://localhost:8001/docs#/default/make_move_api_game_move_post

with :

```
curl -X 'POST' \
  'http://localhost:8001/api/game/move' \
  -H 'accept: application/json' \
  -H 'Content-Type: application/json' \
  -d '{
"board": [["","",""],["","",""],["","",""]],
"currentPlayer": "X",
"move": { "row": 0, "col": 0 }
}'
```

Response should be :

To check for error :

docker ps

docker logs <container_id_or_name>

AI Container

To build : **docker build -f Dockerfile.ai -t banditgames-ai-ai .**

To run : **docker run --rm -p 8002:8002 banditgames-ai-ai**

To test :

{"board": [["X","",""],["","O",""],["","",""]],
"current_player": "X",
"legal_moves": [
{ "row": 0, "col": 1 },
{ "row": 2, "col": 2 }
]
}

And the response should be:
